

Online E-learning - Safe Driving Plus - Trucks

Background

This course is a highly interactive online training programme designed to help ensure that all of your truck drivers have a 'baseline knowledge' of defensive driving best practice and techniques.

The course can be used following an appropriate risk assessment; to support current safe driving initiatives; or as a refresher training tool in between regular practical driver training sessions.

There are 12 informative and fully interactive modules for your truck drivers to study and enjoy.

Objectives

The aim of this *Safe Driving Plus – Trucks* course is to reduce your truck drivers' risk of being involved in an accident by helping them to drive more safely.

Topics

The e-learning course consists of modules on:

- Introduction
- Your vehicle
- Are you fit to drive?
- The professional driver
- Driving comfortably
- Your driving behaviour
- Safe driving techniques
- ABS & traction control
- Motorway driving
- Reversing & manoeuvring
- Adverse weather
- Your duty of care

The risk and training/e-learning data is stored and managed using the PACE administration system, which is an application that provides centralised management and reporting for the e-learning and risk assessments. PACE enables training and risk assessments to be monitored and analysed from any PC with a suitable browser and Internet connection - from anywhere in the world.

Duration

This course may be taken module by module, each of which will take approximately 10 minutes, therefore a total duration in the region of two hours.
