

[FleetDirections E-Learning]

FleetDirections e-learning is a highly interactive online training programme designed to help clients ensure that all drivers have a 'baseline knowledge' of defensive driving best practice, knowledge and techniques.

Divided into six modules, the eLearning programme reinforces the importance of controlling a driver's 'attitude swing' as the key to safer driving. The modules include:

- What is defensive driving?
- Importance of attitude and behaviour
- A planned system of driving
- Hazard perception
- Twenty tips to save your life
- Knowledge check

Students are allowed to complete the modules over a period of time which helps enhance the continued learning process.
